Professional Summary

Quantitatively minded Computer Science Engineer with a strong foundation in Python, SQL, and Data Analytics, with hands-on experience in Pandas, NumPy, SQL, Excel and PowerBI. Skilled in data cleaning, transformation, exploratory data analysis, visualization, and extracting meaningful insights from datasets. Experienced in developing data-driven applications using Flask and applying analytical and problem-solving skills to academic projects. Interested in financial markets, portfolio analytics, and data-driven decision-making, with a commitment to continuous learning and writing efficient, modular code.

Technical Skills

- **Programming Languages:** Python ,SQL
- **Web & API:** HTML, CSS
- **Databases:** MySQL
- **Backend Framework:** Flask
- **API Development:** REST APIs, JSON, API Integration
- **Tools & Practices:** Git, GitHub, VS Code
- **Data Analysis & BI Tools :** Excel, Power BI, ETL
- **Operating Systems:** Windows, Linux
- **Concepts:** Data Analysis, Data Management & Reporting, Data Validation & Data Transformation, Software Development

Projects

SwadHub (Food Delivery Analytics & AI Platform)

- **Data Pipeline:** Engineered a Python and SQL ETL pipeline to clean raw delivery datasets and generate structured aggregates.
- **AI Integration:** Built a natural language AI agent backend to automate data querying and insight extraction.
- **Dashboard & Deployment:** Developed an interactive metrics dashboard, deploying the full-stack system architecture using Docker.

Career Hub

- Developed a web-based career platform connecting students with jobs, internships, and professional development opportunities.
- Implemented student registration, login authentication, profile management, job/internship search, and application tracking.
- Designed and managed the MySQL database for storing and retrieving student, job, and application data.
- Applied responsive UI design and software development fundamentals to create a user-friendly platform.

Data Hiding in Multimedia using Steganography

- Developed a secure multimedia security system for concealing sensitive information within digital media files using advanced steganography techniques.
- Implemented data embedding and extraction algorithms in Python to securely hide and retrieve confidential data from image and audio files without noticeable distortion.

Internships

Contriver

Feb 2026 – May 2026

- Developed practical Python programming skills for Data Analysis, Data Visualization, and Machine Learning applications.
- Gained hands-on experience with NumPy, Pandas, Matplotlib, Seaborn, and Scikit-learn.

Softmusk Solutions

Nov 2023 – Dec 2023

- Learned the fundamentals of Cloud Computing, including cloud service models (IaaS, PaaS, SaaS) and deployment models (Public, Private, Hybrid).

Education

Bachelor of Engineering (CSE), Jain College of Engineering & Research, Belgum

2022 – 2026

CGPA: 8.2

Pre-University (PCMB), BRPU College, Athani

2021 – 2022

80.32%

Achievements & Activities

- Participated in The Second Mind Hackathon, a 24-hour national-level hackathon organized by IIT Hyderabad's Tinkerers' Lab at Tontadarya College of Engineering and Technology, Gadag.
- Attended a Cybersecurity and Digital Forensics Workshop during Cybersecurity Awareness Month at KLS Gogte Institute of Technology, Belagavi.

Certificates

- Python Programming – Infosys Springboard
- NPTEL – Data Structures and Algorithms
- C Programming – Udemy
- IEEE Research Paper Publication – "Agentic AI: Autonomous Decision-Making Systems Using Intelligent Agents" (IEEE, 2025)
